

WRIGHT GROUP ARCHITECTS-PLANNERS P.L.L.C.

Wright Group has extensive experience with a wide range of Educational Projects - Elementary, Middle, and High Schools.

From some of the smallest school districts to some of the largest school districts and charter school entities, Wright Group provides extensive architectural experience, quality products and professional services, exceptional communications and interactive methodology, and we have numerous recommendations and awards to showcase our skills.

We've included some photos of our most recent projects: Preston Hollow Elementary School (Dallas ISD); Cooper ISD; and Blackwell ISD.

In addition to Educational Projects, we have recently completed a large (40,000 SF) youth based sports center that has soccer, baseball, and football fields. The baseball section of this all encompassing sports complex has dormitories, locker rooms, showers, players lounge, weight and training rooms, nutrition station, and auditorium. Accommodations for visiting professionals and a dining hall with chefs specializing in nutritional meals as well as a pro shop, batting cages, event room, parents lounge, administrative area, private physical training rooms, and many more amenities are included on this extensive project. We have started work on a 100,000+ SF multi-use sports complex next to this facility.
